

Optical Character Recognition (OCR) technology offered by Wordcraft, a standalone solution fully integrated with P3fax and P3doc. This powerful technology is the most precise way to convert paper into your favourite PC applications.

P3ocr allows you to quickly and accurately turn paper documents into editable electronic documents using any standard software application. Once converted, your P3ocr document can then be sent to Wordcraft's document management system P3doc making it easier to file and retrieve. P3ocr will convert even the most difficult to read or low quality paper documents.

User Features

Accuracy is of course a very important factor in an OCR programme, if accuracy is not guaranteed then the document may as well be re-typed. It is the re-typing which OCR replaces therefore saving time and money. OCR customers need to be assured that the final electronic documents contain the same text, images or graphics as per the original.

Here are just some of the benefits:

- Multilingual Recognition
- Integration with standard applications
- PDF Conversion
- Barcode Recognition
- Resolution Control
- Custom Converters

Technical Features

P3ocr can be managed from anywhere on the network using a web-browser interface. The simplicity of P3ocr means that there is little overall maintenance required.

The P3ocr server has a rule-based decision system that allows you to define how different documents will be handled. Defaults can be set for each type of document, however these can be changed on a per document basis for added flexibility.

P3ocr utilises the powerful, award winning ABBYY FineReader Engine.

Further Information

Contact Wordcraft team below for evaluation versions, pricing or technical specifications.

**Converts major image formats including:
TIFF, JPG, BMP, PDF**

Simple Interface

Volume based licensing model

Returns document in PDF, Text, RTF or HTML formats

Integrates with P3fax & P3doc for seamless workflow management

New **Unimessage P3**

P3ocr is part of Unimessage P3 - products designed to work independently, which integrate for seamless workflow management. P3 Products Include:

- **P3fax** a multi-user network fax and unified messaging server.
- **P3doc** a simple and efficient Document Management System. Ideal for companies that want to reference important documents from a central source using a simple search tools.
- **P3console** a useful general utility for creating and editing multi-page images.
