

Wordcraft Launches Unimessage P3 Solution

Derby, UK — October 10, 2007 — Wordcraft International Ltd, a developer of market leading fax, print, and scan software solutions for the MFP market, today announces the general availability of **P3fax and P3ocr**, two modules from the Unimessage P3 solution. Both P3fax and P3ocr include support for Microsoft Vista 32-bit and 64-bit hardware; Microsoft Office 2007 and Microsoft Internet Explorer 7. The release also includes support for CAPI 2.0.

P3fax is the third generation fax, print and scan solution from Wordcraft International. Developed in partnership with one of the world's leading MFP manufacturers before becoming generally available. P3fax replaces Unimessage Pro, an earlier highly successful product. P3ocr offers optical character recognition using the latest ABBYY finereader engine and can be used standalone or integrated with P3fax. Both products offer enhanced support for Microsoft applications, therefore providing customers with continuous use of Wordcraft technology in the latest application environments.

Further modules for the Unimessage P3 modular document management solution shall be released early 2008.

Key benefits of P3fax and P3ocr include:

- Interoperability with latest Microsoft applications and operating systems
- Interoperability with other leading mail applications
- Web Interface
- Network Device Management
- User friendly icon driven interface
- Embedded commands
- LDAP phonebook compatibility
- Supporting additional languages – Japanese, Korean and Chinese

"We are pleased to announce the general availability of Unimessage P3fax and P3ocr, we are committed to providing our customers with the best tools therefore it was important to develop a new solution to ensure compatibility and interoperability with the latest technologies," said Andrea Roach, Managing Director, Wordcraft International. "Our unique modular approach provides greater flexibility for our customers and we are now looking to expand on our current supported platforms."
